PRODUCT DESCRIPTION

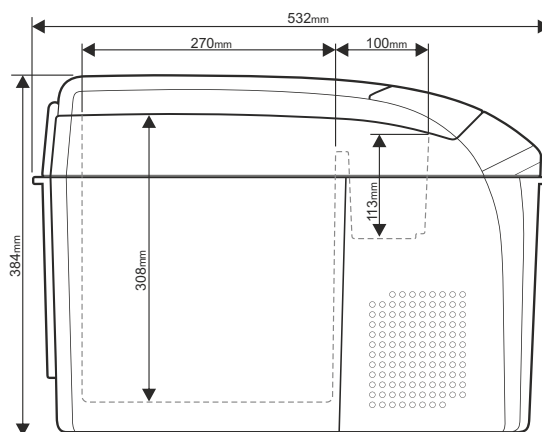

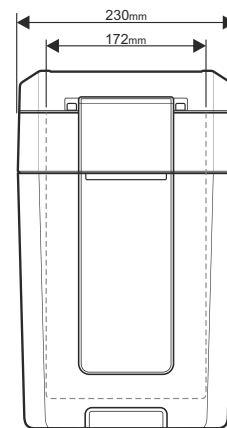

- A portable refrigerator is used to cool food products.
- Thanks to high-class insulation and an efficient compressor, the cooling process is extremely fast.
- Turbo mode allows for an additional acceleration of the cooling process of the device's contents.
- The refrigerator can be powered by direct current (12/24V) or alternating current (100-240V) using the included AC/DC adapter.
- The device is equipped with a discharge protection to prevent the vehicle battery from draining and overvoltage protection to safeguard it from sudden voltage spikes in the electrical grid.
- The control panel with a clear LED screen enables intuitive control of the device.
- The included shoulder strap allows you to carry the device comfortably.
